*1 with factory optional two built-in paper magazines or three built-in paper magazines and optional sorter *2 with optional 10-/12-order sorters *3 with factory optional three built-in paper magazines and 14-/17-order sorters
*4 with factory optional four built-in paper magazines and 14-/17-order sorters *5 with factory optional two built-in paper magazines or three built-in paper magazines
*6 with factory optional two built-in paper magazines or three built-in paper magazines, and optional 10-/12-order sorters

Performance varies depending on processing capabilities of the Image Controller. Specifications are subject to change without notice. All brand names or trademarks are property of their respective owners.

DIGITAL MINILAB
Frontier 700
Series

LP7000/LP7100/LP7200
LP7500/LP7600
LP7700/LP7900

We now offer seven models, from compact to medium- and High-performance digital printer processors. Select the optimal model to meet your shop needs.

Now you can configure the best possible digital printer processor for your shop needs by selecting from compact models that can be installed with a 1m² footprint to high-performance models capable of 2360 prints per hour (4R). Amazing, ultra-high quality prints are available for a variety of occasions and settings. The Digital Minilab Frontier creates an even brighter future for your photo business.

Compact Models

Can be easily installed in various locations

LP7000 is loaded with optional Digital Imaging Controller and flatbed scanner.

iBeam Digital Exposure Engine Approx. **760** prints (4R) per hour
Frontier LP 7000 Digital Printer Processor

Standard equipment: One built-in paper magazine, 3-order sorter

LP7100 is loaded with optional Digital Imaging Controller and 10-/12-order sorters.

Laser Engine Approx. **810** prints (4R) per hour
Frontier LP 7100 Digital Printer Processor

Standard equipment: Two built-in paper magazines, 3-order sorter

LP7200 is loaded with optional Digital Imaging Controller and three built-in paper magazines.

Laser Engine Approx. **1040** prints (4R) per hour
Frontier LP 7200 Digital Printer Processor

Standard equipment: Two built-in paper magazines, 10- or 12-order sorters

Medium-Performance Models

Provide high value-added prints in every shop

Laser Engine Approx. **1180** prints (4R) per hour
Frontier LP 7500 Digital Printer Processor

Standard equipment: Two built-in paper magazines, 14- or 17-order sorters

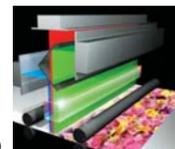

LP7600 is loaded with optional three built-in paper magazines.

Laser Engine Approx. **1480** prints (4R) per hour
Frontier LP 7600 Digital Printer Processor

Standard equipment: Two built-in paper magazines, 14- or 17-order sorters

iBeam Digital Exposure Engine

The newly developed iBeam Digital Exposure Engine prints high-quality, vivid images at a high resolution of 300 x 300dpi.

LP7000

High-Performance Models

Swiftly process large volume orders

Laser Engine Approx. **2120** prints (4R) per hour
Frontier LP 7700 Digital Printer Processor

Standard equipment: Two built-in paper magazines, 14- or 17-order sorters

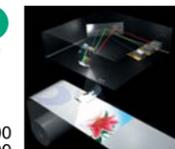

LP7900 is loaded with optional four built-in paper magazines.

Laser Engine Approx. **2360** prints (4R) per hour
Frontier LP 7900 Digital Printer Processor

Standard equipment: Two built-in paper magazines, 14- or 17-order sorters

Laser Engine

Due to high-resolution output of 300 x 600dpi, high-quality images are printed with life-like color tones.

LP7100/7200
LP7500/7600/7700/7900

Film Scanners

High-performance film scanners are available for the Frontier. You can choose the optimum scanner for your shop's business needs.

SP-500

Despite its compact design (0.1m² footprint) and light weight (21kg), it offers superior productivity of 135-film scanning at 211 seconds. This is a compact film scanner specifically for 135-film.

SP-3000

By introducing the automatic film carrier as standard equipment, the SP-3000 can scan both 135 and IX240 film. With the optional carrier, it enables you to scan medium-format film.

Compatible with four/three built-in magazines (factory option)

Up to four built-in paper magazines can be loaded.* Suitable for print orders with various sizes as well as large orders of a uniform size. Supports efficient print production by minimizing the number of times necessary to change the paper magazines.

* Up to three built-in paper magazines can be loaded in the LP 7000/7100/7200. Up to four built-in paper magazines can be loaded in the LP 7500/7600/7700/7900.

Four built-in paper magazines

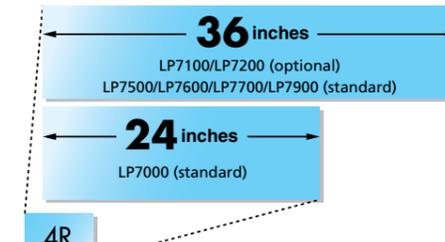

Three built-in paper magazines

36-inch length print capacity

LP 7500/7600/7700/7900 incorporate a standard 36-inch (914.4mm) maximum length print capacity, which is optional for LP 7100/7200.

Now shops can offer new value-added prints to customers.

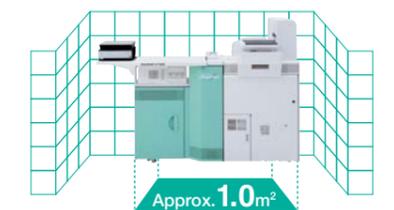

Note: The LP 7000 has a 24-inch maximum length print capacity.

4R

Small footprint of just 1.0m² (10.7 sq. ft.) (LP7000)

With a footprint of approximately 1.0 m², the compact LP7000 can be installed in various locations, achieving greater freedom in deployment. It facilitates the creation of new photo businesses including the introduction in business domains previously unavailable.

Approx. 1.0m²

Auto Set-Up

With the auto set-up function, pre-operation work has been streamlined. When temperature control of a processing unit is completed at a pre-programmed time, Frontier automatically generates a calibration printout, transmits the data to the densitometer, and implements necessary measurements and adjustments. Also, by using the automatic control strips running check unit (optional), it can automatically process a control strip.

Built-in densitometer

Automatic control strips running check unit (optional)

Print Interrupt (10-/12-/14-/17-order sorters)

This function allows you to interrupt large-volume order print orders in progress to execute a higher priority express print order. Sorters for regular orders and express orders are displayed in different colors.

Fujicolor Crystal Archive Paper

Strongly recommended as the optimum color print paper for the Frontier series, Fujicolor Crystal Archive Paper offers faster results along with superior print quality.

Fujicolor Crystal Archive Paper

CP-49E rapid processing chemical system

Adoption of the CP-49E rapid processing chemical system enables chemicals to be replaced at the touch of a button.

FUJIFILM's cutting-edge technology realizes high-quality image processing

Image Intelligence™

Incorporated Image Intelligence™ automatically compensates for problematic conditions, such as, poor lighting, backlighting, high contrast, underexposure or overexposure. Image Intelligence™ also makes skin tones more natural and facial expressions more distinct. Processing time is reduced because photo image correction is automatic at the same time ensuring attractive, customer-pleasing prints.

Original image

Optimized image after image processing

Skin color adjustments and smoothing of skin tones that formerly required manual retouching can be processed easily. These automated image-processing capabilities enable shops to improve productivity and to efficiently provide high value-added prints.

Original image

Skin smoothing

Reproduces skin tones with a smooth, beautiful texture. Suitable for portraits and other uses.

Original image

Skin color adjustment

Adjusts skin color only without changing the color of clothing or background.

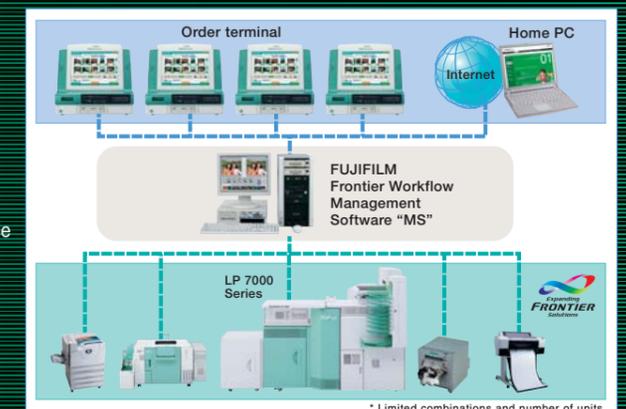

Outstanding Scalability

"MS" outstanding scalability can handle various output devices, including multiple networked Frontier units as dye diffusion thermal transfer printers and wide format inkjet printers.

Expanding Frontier Solutions
